

Coronavirus (Covid-19) Update from CT4N & Nottingham Community Transport

CT4N & Nottingham Community Transport continue to monitor the developing situation regarding coronavirus (Covid-19). Our approach is that we will follow the latest guidance from Her Majesty's Government and Public Health England.

CT4N & Nottingham Community Transport are operating all timetables and services and will do so until otherwise notified. Should there be any updates, then customers will be advised via our social media pages, our websites and in the case of Easylink, via telephone.

What are CT4N & Nottingham Community Transport doing to limit the spread of coronavirus (Covid-19)?

- We will ensure that all vehicle interiors are kept clean, focussing on areas within the bus that are touched the most, which includes hand poles, seat backs and handles and driver cab areas.
- All buses will receive additional cleaning on a daily basis due to the high volume of customers travelling.
- Issuing all staff with hand sanitising bottles, for their health and safety.

Should any employee contract the virus or display symptoms we shall follow NHS guidelines. The required period of self-isolating will commence until the employee is cleared and able to return to work.

What can you do to help reduce the risk of Coronavirus (Covid-19)?

- Keep up to date with Public Health England's advice related to coronavirus, which is available at www.nhs.uk/coronavirus
- Wash your hands with soap and water for at least 20 seconds, or use hand sanitiser, especially once you have finished travelling.
- Ensure that you cover your mouth and nose with a tissue or your sleeve (not your hands) if you cough or sneeze.
- Think about other people - If you develop a high temperature or a new, continuous cough, then please don't travel and stay at home.

As our staff handle money, please don't feel offended if they refuse to take money directly from your hand. Simply place any money tendered for your fare on to the cash tray located on board the bus. Our staff will then place any change back on to the tray.

Finally, we know that our customers rely on the services we provide to get them to work, college, hospital or other medical practices, school or the shops. By everyone following the guidelines above and considering any up to date information provided by Public Health England and Her Majesty's Government, we can ensure that services are kept in operation for all customers, whilst maintaining the welfare and safety of our staff.
