24th April 2020

CT4N to reintroduce more bus services

CT4N is pleased to announce the re-introduction of more services from Monday 27th April 2020.

Following two cases of COVID-19 amongst its driving staff and with concern for staff welfare, the management of CT4N took the painful decision over the Easter weekend to suspend its operations, to give it time to review all its sanitisation and safety arrangements.

Managing Director Ian Combellack said "I am pleased to announce the re-introduction of more services next week which will include some of the Locallink services. We are aware that a number of people rely on these services so that they can get to work. Furthermore, our Easylink service is also available for areas that are not currently being served by the Locallink network."

In addition to the services introduced this week, the next services to be reinstated from Monday are as follows:

- Locallink services L2, L4 and L9
- Worklink service W1
- Notts County Council services L73, L74 and L75
- Derbyshire County Council services 14 and 29

Details of the services that will be reinstated will also be announced on the CT4N website www.ct4n.co.uk as well as Facebook and Twitter links and direct communication with the key locations served.

Ian concluded: "There are minor timetable changes for some of the services, but all information will be available on our website, or passengers can contact us by phone on 0115 986 3355."
